

## **IFDNRG Web Hosting**

**Last updated April 20<sup>th</sup> 2004**

IFDNRG operate a premium high specification web hosting service out of our own switched network in Telehouse, London.

Our network is connected to the internet via multiple redundant Cisco routers and through the use of Level 1 ISP's such as Telia, Level3 and Teleglobe , have excellent global routing. In addition peering arrangements with over 100 UK ISP's mean that there is no better place to be hosting for UK traffic.

Our web servers are all high specification, dual processor machines utilising fast SCSI disks in RAID configurations. We provide hosting for a range of discerning clients who include some of the top global brands.

We provide an online client management portal which provides facilities for all aspects of domain management and integrates a comprehensive range of services available.
